Survey of Public Interest in Obtaining Classification Definitions in Microfiche

The Patent and Trademark Office is planning to offer patent "Classification Definitions" in microfiche for sale to the public through the Superintendent of Documents. Paper copies will continue to be available through the Patent and Trademark Office. Publication of this important and voluminous series of documents in such a microform will make it available at considerably less than the price now charged for the paper edition. Moreover, much of the work involved in maintaining the paper edition in current condition to reflect changes made by Classification Orders will be eliminated for subscribers to the microfiche edition.

Purpose of the Survey

The purpose of this survey is to determine (1) whether there is sufficient market interest to justify such an offering, and (2) how the definitions should be offered to best serve buyers; i.e., whether to offer them in complete sets by subscription, including updates over a period of time, or as individual items only.

Description of the Classification Definitions Microfiche

A Classification Definition microfiche is a sheet of film measuring 4'' x 6'' which has a capacity for recording 98 pages of information at a page size reduction of 24 to 1. Images are of the negative appearing type in a diazo film.

An entire set of Classification Definitions consisting of about 320 separate publications (one for each class) would be contained in an estimated 360 microfiche, as some of the publications are of such length as to require more than one microfiche.

The first microfiche edition of the Classification Definitions will incorporate all current and outstanding addenda into the definitions either by direct entry into the text or through annotations which direct the reader to the proper addenda. For some of the definitions, this will eliminate the need for referring to the addenda documents and, for those changes which are too voluminous to enter in the body of the definition, the annotations will facilitate reference to the separate addenda.

After initial publication of the entire set of Classification Definitions, further publication will occur about quarterly to offer definitions of new classes resulting from reclassification effort in the Patent and Trademark Office, and updated definitions which incorporate changes contained in newly published addenda. It is estimated that each quarterly update will consist of a mix of from 150 to 175 new or republished Classification Definitions. The republished definitions are intended to entirely replace earlier edition definitions.

Prices can only be estimated at this time. However, it is expected that a full set of the initial edition of Classification Definitions in microfiche and three following quarterly sets of new and updated (replacement) definitions in microfiche would be offered for sale at approximately $170. This contrasts with the price of a full set of publications in paper, without updates, of about $830. Prices for individual Classification Definitions in microfiche, if offered, are expected to be lower than for paper copies as well.

Survey Questions

If you or your organization are interested in obtaining the Classification Definitions in microfiche, please write to Mrs.

Sarah Wilson of the staff of the Superintendent of Documents at the address given below to express that interest. In your letter, please address the following questions:

(1) Which of the following best describes you (or your organization)?
   (a) Individual
   (b) Law Firm
   (c) Corporate patent department
   (d) Foreign government or institution
   (e) Other—please specify

(2) How will you or your organization prefer to purchase Classification Definitions in microfiche?
   (a) Subscribe to full set and all updates within one year, and on an annual basis thereafter (a multi-year subscription is an additional possibility).

   You will receive in the initial shipment, a complete set of (the first edition of) the Classification Definitions on microfiche. Thereafter, on a quarterly basis for the balance of the year (or subscription, whichever is later), you will receive new microfiche for all class definitions which have been reclassified or updated and for newly created classes.

   (b) Purchase only those microfiche selected from periodically published lists of newly announced or updated definitions.

   As new definitions are prepared or old ones changed through publication of new addenda, their publication will be announced in the OFFICIAL GAZETTE. Customers will order the desired definitions in microfiche as individual items. No subscriptions or "standing orders" could be accepted. Costs per unit of individually ordered microfiche will be somewhat higher than for subscriptions to sets.

(3) If you prefer the second choice in item (2) above, approximately how many definitions would you expect to purchase each year? Remember that the "average" definition will be updated in some way about twice annually.

Representatives of government depository libraries are requested not to respond to this survey, as they will be canvassed separately and directly by the Government Printing Office.

Please send your replies by Sept. 21, 1979 to:
